# Introduction

With the aim of providing essential information about its activities and results in the previous year, Bratislava Stock Exchange (BSSE) this year again continues the tradition of publishing the Factbook.

The year 2006 was in certain way a turning point for the Stock Exchange, as the Government of the Slovak Republic started fulfilling the plan of consolidation of the capital market infrastructure. In March 2006, the Stock Exchange became a 100-percent shareholder of the Central Securities Depository of the Slovak Republic (CSD), which has increased the state share in the Stock Exchange's registered capital. This share can be subsequently offered to a strategic partner; however, the relevant decision rests with the new government that has resulted from the parliamentary elections in June. Both the Stock Exchange and the Central Depository have thus gained time to implement at least some changes for the market's benefit before the anticipated sale starts. This is one of the reasons why we have decided to publish a joint Factbook, in which the reader can find information on both the BSSE and the CSD in a structure that the Factbook readers have been accustomed to. The publication is compiled to provide needed information for experts in the capital market as well as for those who are new to the capital market issues.

This year you can again find all substantial information in the printed edition of the Factbook, whereas its electronic edition now includes also analytical information on the listed companies and more detailed statistical data related to trading. The electronic edition of the Factbook can be found on the BSSE's website ([www.bsse.sk](http://www.bsse.sk)), as well as on the website of the CSD ([www.cdcp.sk](http://www.cdcp.sk)).

The Factbook is a bilingual publication – the English translation's possible deviations from the original have no substantial influence on the content.

# KEY EVENTS

1/I/2006

- Following the Government's decision on **integration of performance of supervision** over the financial market entities, the competence is transferred from the Financial Market Authority to the National Bank of Slovakia.
- **A new Act on Financial Market Supervision** comes into effect. The Act sets out the general rules of procedure for the National Bank of Slovakia in the financial market supervision in the areas of banking, capital market, insurance industry and pension savings.

30/I/2006

- The shares of the Central Securities Depository ( CDCP), the 100-percent owner of which is the Ministry of Finance of the Slovak Republic (MoF), are transferred to the National Property Fund of the Slovak Republic (NPF).

28/III/2006

- **The BSSE's registered capital is raised to 343,584,000 SKK** through a non-financial deposit of the National Property Fund. The deposit represents a 100-percent property share in the Central Securities Depository's registered capital.

1/V/2006

- **An amendment to the Collective Investment Act and to the Act on Securities and Investment Services** comes into effect. Among other things, the amendment modifies the independent register of dematerialised units by asset-management companies, and introduces a new type of a CSD member's account – the holder account.

20/IX/2006

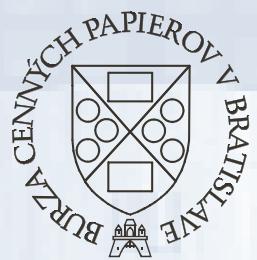

- The CDCP grants membership to its **first foreign member** – the Polish central depository (KDPW).

1/I/2007

- **An amendment to the Act on Banks** comes into effect. The amendment includes **an amendment to the Act on Securities and Investment Services** which, among other things, specifies the conditions and procedure for execution of a public offer to take over, and sets conditions under which the squeeze-out right and the sell-out right can be applied.
- **An amendment to the Act on Accounting** comes into effect. It, among the other things, specifies which companies have to comply with International Financial Reporting Standards (IFRS).

# IMPORTANT FACTS

## SECURITIES AND TRADING - GENERAL OVERVIEW

As of the end of the year 2006, the BSSE registered on its markets a total of 358 issues of securities (i.e. shares, units and bonds). That includes 32 issues traded on the main listed market, 73 issues on the parallel listed market and 253 issues on the free market (including one issue of Eurobonds). No issue of securities was registered on the new listed market.

No new issue was registered on the Stock Exchange's share markets in the year under review. Similarly, no issuer used the possibility to increase a company's registered capital by increasing the volume of the already registered securities. In the course of the year, the BSSE markets admitted a total of 32 new issues of domestic debt securities (28.7 billion SKK). In addition to the new bond issues, the influx of capital to the Stock Exchange markets continued also via admission of new tranches of the already registered government bonds. The issued volume of 4 government-bond issues was increased this way in the course of the year 2006, with its total nominal value amounting to 26.2 billion SKK.

The total financial value of the capital newly admitted to the Stock Exchange markets in 2006 amounted to 54.9 billion SKK. Of all the newly admitted issues, 31 issues were admitted to the market of listed securities (including 1 government bond, 5 corporate bonds, 3 bank bonds and 22 mortgage bonds) and 1 new issue of corporate bonds was registered on the regulated free market.

As of the last trading day of the year 2006, total market capitalisation of the securities registered on the BSSE markets amounted to 581.7 billion SKK (+1.4% in comparison with the year 2005). Out of that, capitalisation of the issues listed on the main market and the parallel market represented 85.0%. Capitalisation of the 10-year Eurobond registered on the regulated free market totals 19.1 billion SKK.

The Stock Exchange's trading system was available to the members during 239 days last year. The financial volume of closed transactions did not manage to surpass the 1-billion-SKK level, as it did two times before. As of the end of the year, it stopped just below that level at 992.1 billion SKK. This volume was achieved in 24,522 transactions, in which a total of 11.6 million units of securities changed hands. In comparison with the year 2005, the total traded volume slightly decreased by 1%; however, the number of transactions rose by 126.8%. The increased trading activity can be attributed mainly to the successful fulfilment of obligatory public offers to take over, announced in the course of the year 2006. This is further illustrated by a year-on-year increase - by a factor of 16.8 - in the number of transactions closed within the obligatory public offers, as well as by the share these transactions have in the total number of transactions (i.e. 58.9%).

The main part of the year's traded volume is represented by negotiated deals, in which securities worth 985.2 billion SKK (-0.9% year on year) were transferred in 3,575 transactions (-15.7% on a year-on-year basis). A total of 20,947 electronic order book transactions (+218.6% year on year) were closed last year, with the financial volume of the transferred securities totalling 6.9 billion SKK (-16.0% year on year). The electronic order book (i.e. price-setting) transactions thus represented a 0.7-percent share in the total financial volume of the year 2006.

The financial volume of REPO transactions in 2006 amounted to 136.9 billion SKK, which is a 60.5-percent decrease on a year-on-year basis. This volume was achieved in 46 transactions, including 24 transactions with equity securities in the financial amount of 94.8 million SKK.

Transactions closed by non-residents last year represented 49.4% (490.1 billion SKK) of the total volume of transactions, of which the buy side accounted for 50.2% and the sell side for 48.6%.

The Slovak share market indicator – SAX – ended the calendar year 2006 at 415.61 points, strengthening by 0.6% on a year-on-year basis. The SDXG for public sector represented by government bonds closed at 104.241 (price) and 118.875 (performance); the SDXG for private sector represented by corporate/mortgage bonds ended the year at 99.005 (price) and 117.664 (performance).

## SHARES - INFORMATION ON ISSUES AND TRADING

As of the last trading day of the year, transactions could be closed in 256 share issues (of 188 issuers), including 46 issues of units. That includes 5 issues on the main listed market, 5 issues on the parallel listed market and 246 issues on the regulated free market. No issue was registered on the new listed market at the end of the year 2006.

No new issue was registered on the Stock Exchange's share markets last year; no issuer used the option of raising a company's registered capital through an increase of the volume of the already registered securities.

In a year-on-year comparison, market capitalisation of all negotiable issues of equity securities registered on the Stock Exchange markets rose by 0.9% to 153.0 billion SKK. Real market capitalisation, i.e. market capitalisation of that part of shares in which at least one electronic order book transaction had been closed (excluding the shares of investment funds plus units), increased by 3.4% and amounted to 145.7 billion SKK (95.2% of the total capitalisation) on the last day of the year. Market capitalisation of the listed market totalled 85.5 billion SKK, strengthening by 8.5% on a year-on-year basis.

There was little interest in share issues among investors in the year 2006. The total financial value amounted to 2.6 billion SKK (traded in 22,045 transactions), representing 0.3% of the total volume of transactions. Comparing the financial value of traded securities and the number of closed transactions on a year-on-year basis suggests an increase of 22.0% and an increase of 178.9%, respectively.

From a perspective of achieved financial volume of transactions, the most successful listed share issues in 2006 (excluding the obligatory public offers to take over) were Istrokapitál (350.7 million SKK; 7 transactions), Všeobecná úverová banka (234.5 million SKK; 1,119 transactions) and Istrokapitál 2 (155.9 million SKK; 2 transactions). The regulated free market was dominated – in terms of volume – by the issue of 1. garantovaná 02 (355.2 million SKK). With 1,177 closed transactions, this issue has also ranked first on the chart of shares with the highest transaction numbers in the said period.

In the year 2006, the BSSE executed a total of 29 new obligatory public offers to take over. The financial volume of transactions within the obligatory public offers amounted to 739.0 million SKK in 14,451 transactions, representing 28.4% of the total volume and 65.6% of the total number of share transactions. (Annex – Table 1)

Transactions closed by non-residents last year represented 53.9% (1.4 billion SKK) of the total volume of share transactions, of which the buy side accounted for 69.6% and the sell side for 38.3%.

As of the end of the year, no share issue was included in the module of market makers.

## BONDS - INFORMATION ON ISSUES AND TRADING

As of the end of the year, 102 bond issues could be traded on the three Stock Exchange markets. That includes 27 issues on the main listed market, 68 issues on the parallel listed market and 7 issues on the regulated free market (including one issue of Eurobonds).

In the course of the year 2006, the Stock Exchange admitted to trading 1 new issue of government bonds in the nominal value of 7.0 billion SKK. The influx of capital to the Stock Exchange markets through government bonds continued as the increasing tranches of the already registered bonds were admitted. The volumes of four government-bond issues were increased this way, with the total nominal value of thusly admitted capital amounting to 26.2 billion SKK. In the period under review, the issuers from the private sector placed on the Stock Exchange's listed markets 22 issues of mortgage bonds (in the nominal value of 16.9 billion SKK), 3 bank bonds (in the nominal value of 2.3 billion SKK) and 5 issues of corporate bonds (in the amount of 2.6 billion SKK). One issue of corporate bonds, in the nominal value of

14.4 million SKK, was admitted to the regulated free market.

The total capital issued through debt securities amounts to 54.9 billion SKK.

As of the last trading day of 2006, market capitalisation of debt securities amounted to 428.7 billion SKK (+1.6% on a year-on-year basis). That includes the listed issues in the amount of 408.9 billion SKK (+2.1% year on year).

In the course of the year, trading on the market of listed securities started with 31 new bond issues of 12 issuers, listed on the main and parallel markets, in the total nominal value of 28.7 billion SKK. (Annex - Table 2).

Due to redemption of bonds in the course of the year 2006, the listing of 4 bond issues (in the total nominal value of 37.0 billion SKK) was ended and their trading subsequently ended on the market of listed securities (Annex - Table 3).

No issuer used the option to prematurely redeem the total nominal value of a bond issue in the course of the year.

In connection with proper redemption of bonds traded on the regulated free market, trading of 1 municipal-bond issue (in the volume of 90 million SKK) was ended last year.

The total financial volume of bond transactions in 2006 amounted to 989.5 billion SKK, representing a 1.0-percent decrease against the year 2005. The number of transactions totalled 2,477, which is a 14.9-percent decline compared to the previous year. Of the total volume of bond transactions, the electronic order book transactions in bonds amounted to 5.7 billion SKK (353 transactions) and negotiated deals totalled 983.8 billion SKK (2,124 transactions).

Transactions in government bonds represented 99.5% of the total volume, amounting to 984.6 billion SKK in 2,145 transactions. The most frequently traded issues were the government bonds of series 143 (359.4 billion SKK), series 188 (195.9 billion SKK) and series 144 (139.3 billion SKK). Among the listed non-government bond issues, the most successful were mortgage bonds VÚB XVII (1.1 billion SKK) and bank bonds Slovenská sporiteľňa 01 (747.8 million SKK). On the regulated free market, the only transferred issue were the bonds of 1. garantovaná, which were traded in the financial volume of 9.2 million SKK in 152 transactions. The government bond of series 200 recorded the highest number of transactions (334) in the period under review. Within the framework of electronic order book transactions, the highest volume was achieved by the government bond of series 201 (1.2 billion SKK; 19 electronic order book transactions).

Transactions closed by non-residents last year represented 49.4% (488.9 billion SKK) of the total volume of bond transactions, of which the buy side accounted for 50.2% and the sell side for 48.7%.

The following issues could be traded in the module of market makers as of the last trading day of the year: 9 issues of government bonds (series 188, 189, 191, 199, 200, 202, 203, 204 and 205), 3 issues of corporate bonds (B.O.F. 05, B.O.F. 06 and I.D.C. Holding IV) and 2 issues of mortgage bonds (Istrobanka I. and Istrobanka II.). The volume of transactions with said issues amounted to 1.9 billion SKK in 52 transactions, representing a 32.7-percent share in the total volume of electronic order book transactions in bonds.

## INDICES

### The SAX index

The main indicator of the Slovak capital market – the SAX index – ended the year 2006 at 415.61 points, which is nearly the same value as at the end of the year 2005. A year-on-year comparison of closing values shows a 0.6-percent increase in favour of the year 2006. In absolute terms, the index appreciated by 2.3 points.

SAX started the year at 407.05 points, losing 1.51% against its closing value from the year 2005. The period of 9 January–6 February saw all base issues

(except for OTP Banka Slovensko) rise in value, which helped the index appreciate to 426.49 points. The most significant growth was that of SES Tlmače, whose closing price from 6 February (461 SKK/share) represented a 15.3-percent increase (+61 SKK/share) against the corresponding value from 1 January. However, the rest of the February trading session caused the value of SAX to fall to 399.79 points (on 24 February). The negative development of the index only stopped one trading day later at 394.10 points. A look to the history reveals that the last time the index dropped under the 400-point level was on 15 February 2005. The biggest factor behind the negative development was a decrease in the closing prices of base issues OTP Banka Slovensko (450 SKK/share; a 12.6-percent loss against 6 February) and Slovnaft (3,100 SKK/share; a 10.1-percent loss). The following two-month period ending 25 April can be described as a revival phase of the SAX index. Positive economic results for the year 2005 published in the daily press, coupled with the decision of both Slovnaft and Všeobecná úverová banka to pay out dividends, spurred the investors' interest in the purchase of these shares, which directly resulted in an increase of prices. This fact was positively reflected in the computation of the SAX index, which recorded the year's high of 439.15 points on 25 April. What had the most significant influence on SAX in this period were a 30.6-percent growth of Slovnaft (+949 SKK/share) to 4,049 SKK/share, an 11.6-percent increase of Biotika (+26 SKK/share) to 251 SKK/share and a 7.8-percent appreciation of Všeobecná úverová banka (+300 SKK/share) to 4,150 SKK/share. The closing prices of the two remaining base issues (OTP Banka Slovensko and SES Tlmače) remained at the same level compared to 27 February. After achieving the year's high, SAX started recording mostly negative corrections on a daily basis. They decreased its strength day after day, until the index hit the year's low of 372.43 points on 16 June. This fall of the index can be attributed to a decrease of all base issues without exception, with the shares of OTP Banka Slovensko registering the most significant drop by 28.9% (-133 SKK/share). After this reduction the SAX index developed in a positive manner, except for a few hesitations, so that it gradually grew to the year-end level of 415.61 points.

The following are changes of the SAX index base issues in 2006 on a year-on-year basis: Biotika (+86.0%; 372 SKK), OTP Banka Slovensko (-25.5%; 400 SKK), SES Tlmače (+3.4%; 455 SKK), Slovnaft (+13.2%; 3,635 SKK), VÚB (+5.3%; 3,950 SKK).

At its meeting held on 25 January 2006, the Commission for the SAX Index decided not to apply any changes to the valid base of the index. On 31 January, the Commission again revised the weights of the base issues in order for the weight of one company to not exceed the 30-percent limit.

Dividends of the following companies were paid out in 2006 and factored in the index: Slovnaft (377.50 SKK; date of record: 3 May) and VÚB (285 SKK; date of record: 5 May).

The SDXG for public sector represented by government bonds ended the year at 104.241 (price) and at 118.875 (performance), with a 4.178-percent yield to maturity and duration of 5.06 years. The sub-index SDXG(<=5) closed at 101.858 (price) and at 115.197 (performance), with a yield to maturity of 4.232% and duration of 2.23 years. The long-term sub-index SDXG(>5) ended the year at 106.620 (price) and at 122.746 (performance), with a 4.166-percent yield to maturity and duration of 7.05 years.

The SDXG for private sector represented by corporate/mortgage bonds ended the year at 99.005 (price) and at 117.664 (performance), with a 4.827-percent yield to maturity and duration of 3.44 years. At the end of the year, the values of the short-term sub-index SDXG(<=5) equalled 98.105 (price) and 117.624 (performance), with a yield to maturity of 5.264% and duration of 1.59 years. The long-term sub-index SDXG(>5) closed at 103.100 (price) and at 117.584 (performance), offering a yield to maturity of 4.695% and duration of 5.33 years.

## Changes in the SAX index base

## The SDXGroup indices

## CLEARING AND SETTLEMENT

In comparison with the year 2005, the total number of securities transferred via the BSSE fell by 41.4 % from 19,783,935 units to 11,585,398 units.

	2006	2005	%
Registration services	27 364	19 552	+ 39,9 %
Pre-trade validations of Stock Exchange members	63 303	21 469	+ 194,9 %
Blockage services	0	2	- 100 %
Transfer services	25 377	11 646	+ 117,9 %
Information services	19	37	- 48,6 %
NBS payments	161	113	+ 42,5 %

Number of transferred securities

In the year 2006, 200 transactions were suspended. Of that, 199 transactions were settled in the T+4 term and 1 transaction in the T+5 term. In most cases, the reason for suspension was a delayed transfer of financial means or a delayed cancellation of the disposal right suspension. Nevertheless, the resources of the Guarantee Fund were not drawn. Securities delivered with delay amounted to 28 767 units (by 26 207 units more than in the year 2005) in the volume of 29 928 013 SKK (by 23 852 112 SKK more than in 2005).

Suspended transactions

## MEMBERSHIP AND INSPECTION

As of 31 December 2006, the BSSE had 22 regular members. The National Bank of Slovakia is authorised to stock exchange trading by law. The following companies ended their regular membership in 2006: CALYON BANK SLOVAKIA, Stredoeurópsky maklérsky dom and Capital Partners.

Entities authorised to Stock Exchange trading

In the course of the year 2006, the Stock Exchange Deals Inspection Department performed systematic and complex inspection of 9 BSSE members, investigated 2 instigations from participants of the financial market concerning stock exchange transactions, and continuously monitored all stock exchange transactions. The Stock Exchange did not impose any sanctions to members in connection with inspection of the members' activity as securities dealers.

Inspection

In compliance with the Stock Exchange Act No 429/2002 (Coll.), the Stock Exchange Deals Inspection Department submitted a report on its activity to the National Bank of Slovakia after the end of every calendar quarter.

# Basic Information and Stock Exchange Activities

Bratislava Stock Exchange (BSSE), founded in 1991, is the **main operator of the securities market in Slovakia**. The Stock Exchange started its commercial activity on 6 April 1993.

The BSSE is a joint-stock company that performs its activity on the basis of a licence granted by the National Bank of Slovakia or, respectively, by its predecessor – the Financial Market Authority. The Stock Exchange's supreme body is the **General Meeting of Shareholders**. The **Board of Directors** is the statutory body and the **Supervisory Board** is the supervisory body of the Stock Exchange. The Stock Exchange's activity is governed by the **Stock Exchange Rules**, which are approved by the National Bank of Slovakia based on a proposal of the BSSE Board of Directors.

Three **Stock Exchange Committees** work as permanent advisory bodies of the Board of Directors: the Trading Committee, the Listing Committee and the Membership Committee. The **Stock Exchange Arbitration Court (SEAC)** was established in the year 1995. Its primary task is to resolve disputes resulting from stock exchange transactions, as well as those arising from transactions closed outside the Stock Exchange. The SEAC is a permanent and independent institution. Proceedings can start only if the concerned parties have a free will to bring the given dispute to the SEAC, which they both confirm by signing an arbitration agreement.

## Terms of Membership

Similar to the majority of foreign Stock Exchanges, the BSSE is based on a membership principle. Stock Exchange membership can be granted only to an entity - a securities dealer, an asset-management company, a foreign securities dealer or a foreign asset-management company - that meets the conditions stipulated by the law and by the Stock Exchange Rules. In addition to the members, the National Bank of Slovakia is authorised to trade on the Bratislava Stock Exchange under the Act No 429/2002 (Coll.).

Natural persons and legal entities that are interested in selling or buying securities via the Stock Exchange can do so only through one of its members. The members' activity is supervised by the National Bank of Slovakia.

The Stock Exchange Rules permit two types of membership: regular (unlimited in time) and temporary (limited to a one-year period).

All members have identical rights and obligations. A regular Stock Exchange member has an additional right to delegate its representatives to the Stock Exchange Committees and to act as a market maker for selected issues. A regular Stock Exchange member – a securities dealer and a foreign securities dealer have an additional right to introduce company issues to the Stock Exchange's markets and to act as ‘tutors’ on the new listed market of the Stock Exchange. A regular member is obligated to pay a one-off admission fee for Stock Exchange membership, and to continuously pay the annual membership fees. A temporary member does not have the aforementioned rights, and is only obligated to pay the annual membership fee. Stock Exchange membership is approved by the Stock Exchange Board of Directors, based on an application submitted by the applicant and subsequent recommendation by the Membership Committee.

## Procedure for Securities Admission to the Stock Exchange Markets

The Stock Exchange organises trading on two markets, with the market of listed securities being further divided into three segments:

- **the market of listed securities** (the main listed market, the parallel listed market and the new listed market);
- **the regulated free market.**

The application for admission of a security to one of the Stock Exchange markets is submitted by the issuer or, respectively, by a Stock Exchange member authorised by the issuer. Decisions on admission to the market of listed securities are made by the Board of Directors or by Director General, after a prior review by the Listing Committee. The Stock Exchange's regulated free market is open to securities that are issued in compliance with the generally binding legal reg-

ulations. In order for securities to be admitted to the regulated free market, the Stock Exchange only requires compliance with the conditions stipulated by the law. The Stock Exchange is entitled to admit a security without the application. In such a case, however, the Stock Exchange must notify the issuer of this fact at least 30 days prior to the planned admission of the security.

### **Basic criteria for securities admission to the listed market (minimum values):**

#### **a) Shares**

	Kotovany hlavny trh Main listed market	Kotovany paralelny trh Parallel listed market	Kotovany novy trh New listed market	Reg. volny trh Regulated free market
Trhova kapitalizacia (TK) emisie (mil. SK) Market capitalisation of issue (million Sk)	500	100	50	-
Podiel v rukach verejnosti / Minimum TK (% emisie / mil. SK) Share of publicly held part of issue/ Minimum market cap. (% of issue/million SKK/)	25% / 250	25% / 50	25%	-
Počet majiteľov emisie Number of issue owners	100	-	-	-
Doba podnikateľskej činnosti. Fin. informácie v prospekte (roky) Period of business activity. Financial information in Prospectus (years)	3	3	3	-
Hospodársky výsledok kladný (roky) Positive economic result (years)	3	3	3	-

Issues admitted to the new listed market must meet an additional requirement of the minimum number of shares in the issue, which is 10,000 units. These issues must also have a 'tutor' (i.e. a regular Stock Exchange member that helps the issuer with introduction to the market and oversees the fulfilment of strict disclosure obligations towards the Stock Exchange and towards the investor community) and a market maker for the given issue. The original shareholders must bind themselves to not sell more than 50% of the shares that have been in their portfolio before an issue of new shares. Further, the original shareholders must pledge that they will not sell any further shares for a minimum period of 12 months after the issue of new shares.

#### **b) Units**

	Kotovany hlavny trh Main listed market	Kotovany paralelny trh Parallel listed market	Regulovaný voľny trh Regulated free market
Čistá hodnota majetku vo fonde (mil. SK) Net asset value in fund (million Sk)	250	50	-

Hospodársky výsledok kladný (roky) Positive economic result (years)	3	2	-

The issues of government bonds are admitted to trading on the main listed market without a Prospectus, and without being reviewed by the Committee.

The issuers that have securities listed on the Stock Exchange are obligated to continuously inform the Stock Exchange of any important circumstances, which could affect the trading of their issues. Economic results must be submitted to the Stock Exchange and published in domestic press quarterly by the issuers from the main listed market and new listed market; the issuers from the parallel listed market must publish and submit their economic results semi-annually. The Stock Exchange ensures that the results are published on the web site of the stock exchange within the shortest possible time, and provides them to information agencies operating on a global basis so that they are available to potential investors in the same extent and at the same time. The issuers that have securities traded on the regulated free market provide

information to the Stock Exchange on semi-annual basis in the extent stipulated by the Act on Securities and Investment Services.

If the issuer does not fulfill a disclosure duty against the stock exchange, the BSSE will suspend trading with its securities and determine an additional period for its fulfillment. If the issuer will not fulfill the disclosure duty also in the additional period, the BSSE will exclude the securities of the issuer from trading. The Stock Exchange notifies the National Bank of Slovakia about suspension of trading and exclusion of a security from trading.

## Trading of Securities

The trading of securities runs daily by means of the Electronic Stock Exchange Operating System (Elektronický Burzový Operačný Systém - EBOS). The counter-parties to a transaction are Stock Exchange members. Members place the orders to buy and the orders to sell by means of EBOS workstations, which are located at their offices and have an on-line connection to the Stock Exchange's central computer. The members can close electronic order book (i.e. price-setting) transactions, negotiated deals and REPO transactions. They can also make a public offer to take over a company.

### Electronic order book transactions

An electronic order book transaction is closed in the EBOS when an order to buy and an order to sell are matched. Electronic order book transactions can be closed in the following modules of EBOS:

- *The module of auction trading* (trading at a single price – fixing) is based on batch processing of the orders to buy and orders to sell securities at a given point in time. For each issue of securities that has been the object of at least one offer, a single auction price is computed according to an algorithm and all transactions are then closed at such price. The computation algorithm ensures a maximum number of traded securities and a minimum overlap, i.e. the difference between total purchase and total sale.
- *The module of continuous trading* allows closing transactions on the basis of continuously placed orders to buy and orders to sell securities. Received orders are prioritised according to their price and, subsequently, according to their time. If the price of the best order to buy is higher than or equal to the price of the best order to sell, the system automatically closes the transaction by matching these orders. The price of securities in one issue may vary in the course of continuous trading.
- *The module of market-maker trading* is based on the function of a market maker who must quote a sale price and a purchase price of a given issue, while having to follow the maximum spread set by the Stock Exchange. When trading is in progress, the market makers' quotations for the issues included in this module are permanently available, which allows buying or selling securities at any time during the trading period. Received quotations are prioritised according to their price and, subsequently, according to their time.

Trading in the module of market makers runs in 'lots', whereas in other modules the number of securities is specified in units. If an electronic order book transaction is closed in the module of auction trading or in the module of continuous trading, the parties to transaction are completely anonymous. In the module of market-maker trading, however, non-anonymous quotations are permitted.

### Negotiated deals

In a negotiated deal, both price and volume are stipulated beforehand by an agreement of the buying member and the selling member, with the parties knowing each other. A transaction closed in this manner is subsequently reported by the members to the Stock Exchange's trading system.

### REPO transactions

A REPO transaction is a sale of securities for cash, with an agreement to repurchase the securities at a certain date in the future and at a price specified beforehand. Every REPO transaction consists of a transfer of securities and a retransfer, the latter of which transfers securities of the same type and

number to the original owner's account. If there are obstacles to the return of a REPO transaction, the concerned parties may agree to change the return date (i.e. prolongation or shortening) of the REPO transaction, to carry out a partial return of securities, or to discontinue the REPO transaction.

## Public offer to take over

In compliance with the Act on Securities and Investment Services, legal and natural persons or persons acting in concert are allowed/required to execute a public offer to take over/an obligatory public offer to take over a company. The Stock Exchange allows executing the public offer to take over/the obligatory public offer to take over by means of its trading system.

## Stock Exchange Indicators

**The Slovak share index - SAX** – is the official share index of the Bratislava Stock Exchange. SAX is a capital-weighted index that compares market capitalisation of a selected set of shares with market capitalisation of the same set of shares as of a reference day. The index reflects the overall change of property connected with an investment in the shares included in the index. What it means is that, in addition to the changes of prices, the index factors in the dividend payments and income connected with changes in the amount of share capital, i.e. with the difference between the current market price and the issue price of new shares.

The starting value of the SAX index – 100 points – is tied to 14 September 1993. Until 30 June 2001, the official daily value of the index had been computed once per day on the basis of average prices. From 1 July 2001, the index values have been computed and published on a real-time basis. The official daily value of the index is the one computed from the closing prices of its base issues.

$$\text{SAX} = \frac{\sum_{i=1}^n P_i^{act} \times G_i}{\sum_{i=1}^n P_i^r \times G_i \times F_i} \times 100$$

$F_i$  = correction factor for  $i$ -th share;

$P_i^{act}$  = closing price of  $i$ -th share on the given day;

$P_i^r$  = closing price of  $i$ -th share on the reference day

(14 September 1993);

$G_i$  = number of shares of  $i$ -th company on the given day.

The formula of the SAX index is flexible; it allows changing participation of individual companies in the index as well as their number. If there is a change in the composition of the index, the correction factors are set in such a way that the index with the new composition continuously follows the development of the index with the previous composition. Only the companies from the market of listed securities can be included in the SAX index; the weight of one company in the index base must not exceed 30%.

A group of bond indices – the SDXGroup - is the official indicator of the BSSE's bond market. The official reference date of the SDXGroup indices is the 1st of January 2004, although some of them are tied to the 18th of March 2004 when the computation of those indices/sub-indices started. The indices in question are the long-term index of the sub-sector of mortgage bonds and the long-term index of the private sector. As of the reference date, the indices had the value of 100 percentage points (100%).

The SDXGroup belongs to the group of proportional indices; the index is computed as a two-component index (price, performance). According to the classification by sectors, the indices of the SDXGroup are divided into the SDXGroup for government bonds (public sector) and the SDXGroup for private sector, with the latter being further divided into the sub-sectors of corporate bonds, bank bonds and mortgage bonds. The indices factor in also the residual maturity of the base issues. By this criterion, the indices are further divided into short-term sub-indices (with residual maturity of under 5 years, but not less than 1 year) and long-term sub-indices (with residual maturity of over 5 years). Seven indicators pertain to each pair of the indices/sub-indices for the individual sectors/sub-sec-

tors: average yield to maturity, average coupon rate, average duration, average maturity, average modified duration, average convexity and number of base issues.

$$SDXG_{C_t} = SDXG_{C_{t-s}} \frac{\sum_{i=1}^n C_{i,t} \times N_{i,t-s}}{\sum_{i=1}^n C_{i,t-s} \times N_{i,t-s}}$$

Price index

$$SDXG_{V_t} = SDXG_{V_{t-s}} \frac{\sum_{i=1}^n [(C_{i,t} + AUV_{i,t}) + KUP_{i,t-s} \times (E_{i,t} + K_{i,t})] \times N_{i,t-s}}{\sum_{i=1}^n (C_{i,t-s} + AUV_{i,t-s} + KUP_{i,t-s} \times E_{i,t-s}) \times N_{i,t-s}}$$

Performance index

$C_{i,t}$  = price of  $i$ -th issue in the base at time  $t$ ;

$C_{i,t-s}$  = price of  $i$ -th issue in the base at time  $t-s$ ;

$N_{i,t}$  = financial volume of  $i$ -th issue at time  $t$ ;

$N_{i,t-s}$  = financial volume of  $i$ -th issue at time  $t-s$ ;

$AUV_{i,t}$  = aliquot interest of  $i$ -th issue in the base at time  $t$  according to standard defined in the issue's terms of issue;

$AUV_{i,t-s}$  = aliquot interest of  $i$ -th issue in the base at time  $t-s$  according to standard defined in the issue's terms of issue;

$KUP_{i,t-s}$  = coefficient that can, in the event of admission of issue, take value **0** (if, at time  $t-s$ , a new issue is admitted to the base within the ex-coupon period), and value **1** if the issue is admitted outside the ex-coupon period. In the event of admission of an issue that does not have ex-coupon, the value of the coefficient still equals **1**. In the event that an issue is not admitted at time  $t-s$  to the base, the coefficient equals **1**;

$E_{i,t}$  = value of coupon rate of  $i$ -th issue at time  $t$ , which (the issue) does have ex-coupon. The coefficient can take value if the issue is outside the ex-coupon period, and value equal to coupon rate of  $i$ -th issue during the ex-coupon period;

$E_{i,t-s}$  = value of coupon rate of  $i$ -th issue which has ex-coupon at time  $t-s$ ;

$K_{i,t}$  = value of coupon rate of  $i$ -th issue at time  $t$ , which (the issue) does not have ex-coupon. The coefficient can take value **0** if time  $t$  does not match the day of coupon payout, and value equal to coupon rate if time  $t$  matches coupon payout of  $i$ -th issue. What it means is that the value of the coefficient equals coupon rate only at the moment of coupon payout; afterwards it decreases to value **0**;

$K_{i,t-s}$  = value of coupon rate of  $i$ -th issue which does not have ex-coupon at time  $t-s$ ;

$i$  = means  $i$ -th ranking of issue in the basket;

$n$  = number of issues in the basket.

## Clearing and Settlement of Stock Exchange Transactions

The clearing and settlement of stock exchange transactions is provided by the CSD. The Stock Exchange sends confirmed commands to register a transfer resulting from closed transactions either to the CSD members or directly to the CSD – depending on whose register keeps the account of a securities owner. The securities register in the CSD is a two-level one, i.e. an owner's account is kept either at the CSD's level or at a CSD member's level.

The clearing and settlement of electronic order book transactions is carried out on a 'delivery-versus-payment' (DvP) basis, within three days from the closing of a transaction (T+3). Negotiated deals and REPO transactions are settled according to a request the members enter into the trading system (from T+0 to T+15); these transactions can only be settled through capital settlement (FoP).

**The Stock Exchange's Guarantee Fund** enables investors who sell securities to receive financial

compensation even when that the counter-party is unable to fulfil its financial liability in time. All Stock Exchange members participate in the Guarantee Fund by paying an initial fee and a floating amount. The latter is represented by an agreed percentage of the average daily volume of electronic order book transactions and block transactions, closed by a member on the BSSE in the previous month. Neither negotiated deals nor REPO transactions are subject to financial coverage by the resources of the Guarantee Fund.

## Inspection Activities

The Stock Exchange members, as well as the National Bank of Slovakia, are subject to inspection by the Bratislava Stock Exchange. The focus of inspection is on monitoring, recording and evaluating information on stock exchange transactions as well as on inspecting the Stock Exchange members' compliance with the Stock Exchange Rules and generally binding regulations, with the aim of protecting the participants of the financial market. In compliance with the Stock Exchange Rules, inspection can be performed in the following manner:

- **Based on instigation by participants of the financial market:** any suggestion of a Stock Exchange member's possible non-compliance with the generally binding regulations or the Stock Exchange Rules is investigated;
- **By random selection:** inspection focuses on transactions selected on a random basis and any documents related to such transactions;
- **Based on findings:** i.e. findings from the continuous monitoring and assessment of the Stock Exchange members' trading activities, performed by the staff of the Stock Exchange Deals Inspection Department;
- **Systematic and complex inspection:** a complex examination of a Stock Exchange member's activity, performed according to an inspection schedule at the place where the member does business.

Inspection is performed by inspection groups. Their members are appointed by Director General from among the staff of the Stock Exchange Deals Inspection Department or other departments of the BSSE. The results of systematic inspection are processed in the form of a protocol; the results of other types of inspection are processed in the form of a written record (if a violation of the generally binding regulations or the Stock Exchange Rules is found). Decisions on possible sanctions are made by the Board of Directors in compliance with the Stock Exchange Rules.

## Stock Exchange Data

Bratislava Stock Exchange provides a wide range of stock exchange data and information; anyone interested can obtain the data they need at the Stock Exchange. For professional users of stock exchange data, the Stock Exchange offers three basic service bundles:

### Complete service on trading in real time

This service provides detailed information on transactions closed on the Stock Exchange in the course of the day. The service comprises three best offers to buy and sell from the module of auction trading, the module of continuous trading and the module of market makers. Also included is the data on closed negotiated deals and REPO transactions, including information on price, number and volume of securities, plus trading day summaries generated after the close of trading. In addition to the aforementioned data, the Stock Exchange informs the subscribers of this service of cancelled transactions and sends them the values of the SAX and SDXGroup indices on a daily basis, as well as the monthly, semi-annual and annual statistics.

### Complete service on trading after the close of trading

This service comprises information on trading after the close of trading, i.e. the price list and information on trading of a concrete security on a given day. The service also provides the values of the SAX and SDXGroup indices on a daily basis, as well as the monthly, semi-annu-

al and annual statistics.

### **Complete service on issuers**

This is a specific service of the Stock Exchange intended for those subscribers who seek information on the companies whose securities are listed on the Stock Exchange. A key part of the service are the daily announcements about issuers. The announcements are sent to the subscribers daily, after the close of trading, and they contain up-to-date information on issuers and their issues of securities. Specifically, it can be information about general meetings and their results, announcements about suspension/resuming/ end of trading of issues, announcements about admission of new securities to the Stock Exchange markets, announcements about cancelled transactions, information about announced public offers to take over, information about a company entering bankruptcy proceedings/ liquidation/ merger and the like. The service also includes the provision of economic results of the issuers whose securities are traded on one of the Stock Exchange's listed markets and, last but not least, information about the payment of dividends by issuers.

In addition to using the aforementioned information for their own needs, the subscribers may also disseminate it to their clients.

## Dissemination of Stock Exchange Information

**CENTRÁLNY DEPOZITÁR CENNÝCH PAPIEROV SR, A.S.**  
**Central Securities Depository of Slovak Republic**

Prezidentko cenných papierov SR

# IMPORTANT FACTS

## PROCESSING OF ORDERS TO TRANSFER ('TRANSFER ORDERS')

In the course of the year 2006, the Central Securities Depository of the Slovak Republic ('CDCP' or 'central depository' hereinafter) performed - via the clearing and settlement system - DvP transfers of securities in the total market price of 800.53 billion SKK. The daily volume of settled securities averaged at 3.34 billion SKK. A total of 25,575 transfer orders, which resulted in DvP transfers of securities, were processed in the clearing and settlement system in 2006. The daily number of transfer orders settled in the clearing and settlement system averaged at 107 orders. In comparison with the year 2005, the CDCP recorded an increase by 89.4 billion SKK in the volume of securities transferred in the clearing and settlement system. In percentage terms, it is a year-on-year increase by 12.57%. The number of processed transfer orders has increased by 16,392 orders compared to the previous year what represents a 178.50-percent increase on a year-on-year basis.

DvP (delivery versus payment) transfers

The volume of securities transferred as a FoP transfers in 2006, expressed in nominal value, totalled 422.55 billion SKK; the daily volume of FoP transfers averaged at 1.76 billion SKK. A total of 23,458 transfer orders, which resulted in transfers of securities, were processed in the year 2006. The average daily number of processed transfer orders, which resulted in an FoP transfer, was 98 orders. In comparison with the year 2005, the volume of securities transferred on a 'free-of-payment' basis fell by 221.82 billion SKK. In percentage terms, it is a decrease by 34.42% year on year. The number of processed transfer orders (for the FoP transfer), which resulted in a transfer of securities, increased by 9,248 orders compared to the year 2005. It is a 65.08-percent increase on a year-on-year basis.

FoP (free of payment) transfers

## VOLUMES OF SECURITIES IN THE CDCP'S REGISTER

The total volume (expressed in nominal value) of book-entry securities that were credited to owner's accounts as of 31 December 2006 amounts to 1,007.92 billion SKK. Out of that, the largest part – 540.96 billion SKK – is represented by shares. The number of issues of book-entry securities that were issued at the CDCP was 2,286 issues as of the end of the year 2006. The volume of bonds that were credited to owner's accounts amounted to 453.88 billion SKK (as of 31 December 2006); the number of bond issues was 362. The volume of co-operative units issued at the CDCP amounted to 12.04 billion SKK; the number of these issues was 612. The number of issues of book-entry units of the unit trust issued at the CDCP was 64; the volume of issues of units amounted to 741.65 million SKK. Other issues (comprising a single issue of the National Property Fund's bond) recorded an unchanged volume of 300.09 million SKK against the year 2005. In comparison with the end of the year 2005, the total volume (expressed in nominal value) of book-entry securities issued at the CDCP rose by 21.46 billion SKK, which is a year-on-year increase by 2.18%. The highest increase was that of bonds; their volume (expressed in nominal value) rose by 5.26% year on year. The deepest decrease was in the volume of book-entry units of the unit trust, which fell by 32.93% on a year-on-year basis.

Year-end state of owner's accounts

A total of 228 new issues of book-entry securities, in the volume (expressed in nominal value) of 86.53 billion SKK, were issued at the CDCP in the course of the year 2006. Out of that, securities in the amount of 52.12 billion SKK were credited to owner's accounts as of the end of the year 2006. Bond issues represented the largest part of the new issues – 66.44 billion SKK, whereas the volume of new share issues last year totalled at 19.95 billion SKK. On the other hand, 174 new share issues were issued in 2006 as opposed to only 43 new bond issues in the same period. In the course of the year 2006, 11 issues of co-operative units in the total amount of 144.86 million SKK were issued. No issue of book-entry units of the unit trust was issued in the period under review.

New issues in the course of the year

A total of 175 issues of book-entry securities, registered in an issuer's register, were cancelled during the year 2006. The total nominal value of said issues was 58.95 billion SKK. The greatest decrease was among bonds, with the volume of cancelled issues amounting to 38.61 billion SKK (i.e. 44 bond issues). They were followed by 121 cancelled share issues, in the amount of 19.87 billion SKK, and 6 cancelled issues of units of the unit trust worth 402.66 million SKK. Four issues of co-operative units, in the amount of 70.70 million SKK, were also cancelled in 2006.

**Issues cancelled  
in the course of  
the year**

## **ISSUER'S REGISTERS, LISTS OF SHAREHOLDERS AND OTHER SERVICES**

As of the end of the year 2006, the CDCP administered an issuer's register for 2,369 issuers of book-entry securities. It is a decrease by 107 issuers (-4.32% year on year) compared to the year 2005.

**Administration of  
issuer's register**

The CDCP kept a list of shareholders for 2,719 issuers of paper-form registered shares last year. It is an increase in the number of issuers by 151 (+5.88% year on year) in comparison with the year 2005.

**Issuers of shares  
in paper form**

The CDCP provides services also on the basis of written requests or orders. In the year 2006, the CDCP processed a total of 22,361 requests for birth registration number/ IČO code submitted by authorised persons pursuant to §110 of the Act on Securities and Investment Services No 566/2001 (Coll.) as amended. That includes 11,810 requests submitted by tax offices (these services are provided free of charge) and 7,414 requests submitted by notaries (these services were provided free of charge from May 2006 till the end of the year). With the average of 4 services for one birth registration number/IČO code, 89,444 services in total were processed for the said authorised persons. Compared with the year 2005, the CDCP processed by 3,205 requests for birth registration number/ IČO code more. It is a 16.73-percent increase year on year. CDCP processed a total of 7,350 written requests of natural persons/legal entities for other services such as a statement of account, change of personal data, etc.

**Services based on  
written request**

# Basic Information

The CDCP was founded on 19 March 2004 via transformation of its predecessor, the Securities Centre of the Slovak Republic ('SC' hereinafter). The SC itself was founded on 22 December 1992 in connection with the first wave of the voucher privatisation. Effective from 16 March 2006, Bratislava Stock Exchange ('BSSE' hereinafter) has become a 100-percent shareholder of the CDCP, as a result of deposit of a state property interest in the CDCP business into the Stock Exchange's registered capital. The ultimate objective of this transformation is the privatisation of the BSSE – CDCP group.

The CDCP is a joint-stock company that operates on the basis of a licence granted by the National Bank of Slovakia or, respectively, its predecessor – the Financial Market Authority. The central depository's scope of activity includes primarily the following:

- registration of issues of securities,
- assignment of ISIN codes,
- administration of securities accounts,
- clearing and settlement of transactions in securities,
- administration of the register of pledges over securities.

The supreme body of the CDCP is its **General Meeting**. **The Board of Directors** is the statutory body and **the Supervisory Board** is the supervisory body of the CDCP. **The Committee for Services** acts as an advisory body of the Board of Directors.

## Membership Principle

The central depository's activity is based upon a membership principle. The CDCP membership is open to banks, securities dealers, foreign securities dealers, other central depositories/foreign central depositories and the National Bank of Slovakia. As of the end of the year 2006, the central depository had 21 members (including 13 banks, 6 securities dealers, 1 foreign central depository and the National Bank of Slovakia). In the case of a bank and a securities dealer, a precondition of membership is the licence to provide investment services, where the bank and the securities dealer must be authorised to provide the main investment services. In the provision of such services, they must be authorised to handle the client's financial means or investment instruments. Both the bank and the securities dealer must be granted a prior consent to perform the activities of a member by the National Bank of Slovakia. The central depository will decide on an application for membership within 60 days from the delivery of application.

A member performs the activities of a central depository member via professionally competent persons who have obtained the CDCP's certificate of competency after successfully completing a training course. The members utilise the central depository's technical facilities to keep accounts and to perform other activities associated with the securities register and with the clearing and settlement of transactions. A member is required to pay a one-off membership fee, and to continuously pay the monthly fee in compliance with the Fee Scale of the CDCP.

## Registration of Issues of Securities

One of the CDCP's core activities is the **registration of issues of book-entry securities**. The central depository currently registers all types of share issues, bond issues (including mortgage bonds), co-operative units and the units of open-end unit trusts. What can also be registered in the central depository are the book-entry deposit certificates, treasury bills, coupons etc., as well as all types of **immobilised securities**.

Upon registration of the first issue, the central depository opens for an issuer the issuer's register that contains information on the issuer and on individual securities. An issue is registered in the issuer's register upon the issuance of book-entry securities.

At the request of an issuer who has issued registered paper shares, the CDCP administers a **list of share-**

**holders for the registered paper shares.** On this list, the central depository records the changes of shareholders, changes in the shareholders' data and changes in the issuer's identification.

## Assignment of ISIN Codes

The CDCP performs the activities of the **National Numbering Agency**, which means that it assigns, alters and cancels the ISIN codes in compliance with the ISO 6166 Standard. An ISIN code is assigned by the CDCP to every issue of book-entry securities.

## Administration of Securities Accounts

In the system of securities registration, the CDCP uses two types of securities accounts. They are **the owner's account and the client account of a member**. A special type of account is **the holder's account** of a member – the foreign central depository.

The owner's account contains primarily data on the account owner and on securities kept in this account. The account owner is at the same time the owner of securities registered in this account. The members of the central depository open owner's accounts for their clients. Directly in its registration, the central depository opens an owner's account for a member where information is kept on the securities owned by the member. In its registration, the central depository shall open an owner's account also for a state authority acting on behalf of the Slovak Republic or for the National Property Fund. For other persons, an owner's account can be open only at a member's request.

In a member's client account, the central depository registers data on securities which owners are registered by the member. The member itself does not own the securities kept in its client account; the owners of such securities are recorded in the member's registration.

In a holder's account of a foreign central depository, the CDCP registers data on securities whose owners are registered with the foreign central depository in a registration created in compliance with the law based on which the foreign central depository is founded.

## Clearing and Settlement of Transactions in Securities

The CDCP performs the clearing and settlement of stock exchange and over-the-counter transactions in securities. The settlement of securities is performed on the '**delivery versus payment**' basis (DvP); the central depository's system of clearing and settlement is based on the standard models BIS Model 1 and BIS Model 2.

In the clearing of transactions, it is possible to use the 'gross' or the 'netting' method, with the latter being available also for clearing of financial obligations and claims. The members of the central depository can choose a method of clearing and settlement; preferred method is the clearing by the gross method. 'T+3' is the standard duration of the settlement cycle for stock exchange transactions. For OTC transactions, the duration of the settlement cycle is not limited.

In addition to the 'DvP' settlement, it is also allowed to deliver securities without a financial settlement. Such delivery is usually performed through a transfer directly in a member's or the CDCP's registration. The central depository also performs the clearing and settlement of the public offers to take over, which are organised by the BSSE.

## Administration of the Register of Pledges Over Securities

The CDCP keeps a special **register of pledged securities** – the Register of pledges. Following an authorised person's order, in this register the CDCP records the emergence, change and termination of contractual and legal pledges over dematerialised securities. In the Register of pledges is also registered the contractual and legal pledge over securities in paper form. The CDCP issues a statement of the Register of pledges based on a request. Information from the Register of pledges is available on the CDCP's website; this information, however, cannot be used for legal purposes.

# BIOTIKA a.s.

---

Biotika, based in Slovenská Ľupča, is one of important producers in the Central Europe's biotechnological and pharmaceutical industries. It was founded in 1953 as a state-owned company, with the aim of providing the penicillin production for the Slovak market. From its foundation to the year 1990, Biotika had been a part of the SPOFA Group comprising all pharmaceutical producers in the former Czechoslovakia. The company transformed into a joint-stock company in 1992, and its privatisation started in the same year. On a worldwide scale, Biotika currently belongs to major producers of Penicillin V, Penicillin G, veterinary antibiotics (e.g. chlortetracycline, salinomycin) and dextrans of pharmaceutical quality. On the Czech and Slovak markets, Biotika is also known as the producer of quality pharmaceuticals for both human and veterinary application.

The company exported nearly 85% of production in 2006. The share of direct supplies to end consumers increased in the course of the year 2006; the volume of export via trading companies gradually decreased. The company's end customers are located in the South-East Asia as well as in Canada, Israel, South Africa, Brazil, Ukraine and Japan. The contractual production of the cystine substance for German company Wacker Chemie AG achieved a substantial volume. Due to the company's pro-export orientation, the Slovak currency's strengthening against the USD/EUR/CZK in 2006 had a negative effect on revenues achieved from the sale of finished products. The company's research and development activities in 2006 focused on the development of biotechnological production and further development of new pharmaceuticals with a higher added value such as polypeptide antibiotic, amino acids, a pharmaceutical for lowering obesity, aromatic and gustative agents. Preparations for a new production program were made in the course of the year 2006. A new centre for production of a new pharmaceutical is being built in co-operation with Swiss pharmaceutical company Lonza Group Ltd. The new pharmaceutical has been included among the generics used in the AIDS treatment since September 2006. Biotika will be making a semi-product, which will then be processed into the finished product by company Lonza Biotec Ltd, based in Kouřim (Czech Republic).

Biotika's organisational structure has changed as of 1 January 2006. The Department of Environment and the Kompostáreň-Čebovce (composting plant) operation were hived-off and, subsequently, a new joint-stock company ČOV was founded. As an external firm, this company provides waste liquidation, sewage water treatment and environmental protection for Biotika. In the year 2006, joint-stock company ČOV (a 100-percent-owned subsidiary of Biotika) prepared a project of expansion and reconstruction of the sewage disposal plant in compliance with the European Union's requirements. A business share in subsidiary Biotika Bohemia Ltd, based in Prague, was sold to company BB Pharma Ltd in September 2006. The latter also bought the licences for production and sale of human pharmaceuticals, produced on a contractual basis by Hoechst-Biotika Ltd for the Czech Republic's territory. In November 2006, Biotika bought a minority business share in subsidiary HOREC Ltd from joint-stock company Zentiva, and subsequently sold the entire company HOREC.

Joint-stock company B.O.F. is the oldest leasing company in Slovakia. Its legal predecessor - B.O.F. Ltd - was founded in February 1991 and started to provide the services of financial leasing on 1 May 1991. In January 1992 B.O.F. transformed into a joint-stock company with registered capital of 20 million Sk. The company's registered capital has been gradually increased to the current volume of 200 million Sk. Following a decision of an extraordinary general meeting of company shareholders, held in November 2006, the registered capital was increased to 500 million Sk from undistributed profit of previous years.

B.O.F. offers a wide range of products such as financial leasing of movable objects of fixed assets, operational leasing, leasing of real estates and instalment sale. In the competition of products of financial institutions named 'Golden Coin 2006', a professional board rated the 'Operational leasing of cars' as the third best product and 'Optimal leasing' as the fourth best one. The company's portfolio of leasing contracts is dominated by the following three object groups: motor vehicles (both passenger cars and trucks), machinery/manufacturing technologies and computers/office equipment. B.O.F.'s complex offer of financial services is supplemented with the services of its 100-percent-owned subsidiary B.O.F. pois'ovací makléř Ltd, which acts as an intermediary of advantageous insurance products and insurance rates for the clients of the parent company. As the first among the Slovak leasing companies, B.O.F. undertook a rating process performed by CRA Rating Agency in the year 2001. In May 2005 CRA Rating Agency confirmed for B.O.F. a short-term CRA Rating 'skP-2' and a long-term local CRA Rating 'Ba+ / skA'. In the year 2006, Moody's Central Europe assigned the company a national rating 'Baa1.sk'.

From the very beginning, the leasing company has adhered to the principles of ethical code in business, as well as the principles of openness, integrity and responsibility. The long-term adherence to said principles has resulted in regular participation in the 'Annual Report' competition organised jointly by companies INEKO, TREND, Sk-media and KPMG. B.O.F.'s Annual Report for the year 2005 was rated as the '2nd Best Printed Annual Report'. In order to provide as much information about itself as possible, the company has been publishing a quarterly named 'B.O.F. NEWS' for five consecutive years.

In the first 9 months of 2006, the company closed 3,241 leasing contracts in the total volume of 3.118 billion Sk (in purchase prices less VAT). In the year 2006, the volume of contracts for the first time in history exceeded the level of 4 billion Sk (less VAT). During the 15 years of its activity, B.O.F. has financed transactions in the total worth of nearly 30 billion Sk (in purchase prices less VAT). The company currently has approximately a 6.5-percent share on the leasing market and, from a long-term perspective, ranks as sixth after the leasing companies owned by big banks and a car manufacturer. B.O.F. also keeps a prominent position in real estate financing and a leading position in technology financing within the framework of the Association of Leasing Companies, of which it is a founding member.

# CAC LEASING Slovakia, a.s.

---

CAC LEASING was founded on 9 April 1993 as 'CAC LEASING Bratislava Ltd'; however, its active operation only started on 1 October 1996. One year later it adopted a decision to transform into a joint-stock company, and was registered in the Business Register under its current name on 31 October 1997. The company's shareholder structure changed in 2003, with the HVB Group becoming a 100-percent shareholder. CAC Leasing has an extensive network of outlets located in Banská Bystrica, Dunajská Streda, Komárno, Košice, Nitra, Poprad, Prešov, Rožňava, Trenčín, Trnava and Žilina.

CAC LEASING Slovakia provides financial and operational leasing for passenger cars and commercial cars, transport means, industrial machinery, technology lines, information technology, agricultural machinery and equipment. In addition to standard leasing, the company provides financing via instalment sale as well as via the CArCredit loan for all car makes. A successful area for CAC LEASING Slovakia is the operational leasing of cars with complex services. For medium and large companies, CAC LEASING Slovakia offers a modern and economical solution of car fleet financing and administration, with a significant cost reduction. Together with its products, the company offers to the clients legal and taxation consulting connected with leasing, as well as intermediation of insurance (via subsidiary insurance-brokerage company CAC poistovací makléř Ltd).

CAC LEASING Slovakia has been the leader on the Slovak leasing market for four years, and continues to keep its prominent position also in 2006. The volume of financed assets worth nearly 9.5 billion Sk (for the three quarters of 2006) confirms that the long-term effort of the leasing company has proved fruitful. Since November 2004 when it started to provide the leasing of real estates, CAC LEASING Slovakia has been achieving very good results in this area. The volume of contracts in this commodity amounted to over 1.5 billion Sk in 2005. In 9 months of the year 2006, it was nearly 1.2 billion Sk. After a relatively short period of operation in the real estate leasing, CAC LEASING Slovakia has become one of the leading companies in this area. After introduction of the EuroGAP insurance, which eliminates the client's financial loss in the event of total damage or theft of car, the company brought to the market an insurance product named the 'Pay-back Ability Insurance' in 2006. This has completed the protection of clients from a viewpoint of safety of financing, financed object and coverage of risks connected with the financing of passenger and commercial cars.

In 2007 CAC LEASING Slovakia will incorporate into the UniCredit Group under commercial name 'UniCredit Leasing', which is identical in most countries of the Central and Eastern Europe. The incorporation will further increase the level and quality of services provided by the company.

# ČESKOSLOVENSKÁ OBCHODNÍ BANKA, a.s.

---

Československá obchodní banka (ČSOB) was founded in 1964 as a state-owned company to provide services in the area of foreign trade financing and free currency operations. The company currently operates as a universal bank not only on the Czech market, but also on the Slovak market via a foreign branch. ČSOB was privatised by Belgian KBC Bank in June 1999, and incorporated into the KBC Bank and Insurance Group. In June 2000 ČSOB overtook joint-stock company Investiční a Poštovní banka. Since March 2005, ČSOB has been a part of the KBC Group NV which had been created through a merger of KBC Bank and Insurance Holding Company with parent company Almanij.

ČSOB's business profile today comprises the segments of retail clientele, small- and medium-sized businesses, corporate clientele plus non-banking financial institutions, financial markets and private banking. In retail banking the company operates under two trade names: ČSOB and Poštovní spořitelna. The latter utilises for its operation an extensive network of the Czech Post Office (Česká pošta). As of 30 September 2006, the bank has been offering services via 229 branch offices in the Czech Republic (not including the outlets of Poštovní spořitelna), 105 branch offices in Slovakia and via various channels of direct banking.

Since 1 May 2006, the KBC Group has started implementing a new organisational structure that accentuates its international dimension and facilitates development of its commercial activities. One of the steps is the integration of retail banking, a network of private banks and insurance companies under single management not only in Belgium, but also in every Central European country where KBC operates. On 7 April 2006, ČSOB increased its share in the registered capital of O.B. HELLER from 50% to 100%, thus increasing also its indirect share in the registered capital of OB HELLER Factoring from 50% to 100%. The two companies have been subsequently renamed to ČSOB Factoring. On 7 June 2006, ČSOB acquired a 100-percent share in registered capital of Zemský penzijní fond. Thanks to this acquisition, ČSOB has become the fourth biggest provider of additional pension insurance in the Czech Republic (measured by the number of policyholders). In November 2006 ČSOB launched the CashBack service as the first company in the Czech republic. Starting from 8 November 2006, the service allows the customers of Albert supermarkets and Hypernova hypermarkets who pay for their purchase with the ČSOB's or Poštovní spořitelna's payment cards to withdraw cash (up to the amount of 1,500 CzK) at the cash register.

ČSOB's long-term rating from rating agencies Moody's and Capital Intelligence is at the highest possible level that can be achieved in the Czech Republic. Due to an increase of rating in the Czech Republic (August 2006) from Fitch agency, ČSOB's rating has so far remained one level lower.

# HVB BANK Slovakia a.s.

---

HVB Bank Slovakia was founded on 25 March 1994, and registered under commercial name Creditanstalt. From 1 January 1999, after merging with banking institution Bank Austria (SR), the bank had operated under commercial name Bank Austria Creditanstalt Slovakia. Its commercial name has been 'HVB Bank Slovakia' since October 2001, as a result of a merger of companies Bank Austria Creditanstalt and HypoVereinsbank Slovakia. The parent company of HVB Bank Slovakia is the Austrian number one - Bank Austria Creditanstalt. Since November 2005, HVB Bank Slovakia has been a member of the UniCredit Group, which offers services and products via 7,000 branch offices in 19 countries to as many as 28 million clients. In the year 2006, UniCredit and Bank Austria Creditanstalt (a member of the UniCredit Group) jointly announced a planned fusion of their Slovak subsidiary companies UniBanka and HVB Bank Slovakia. The fusion will result in the emergence of the fourth biggest Slovak bank with total assets of 127 billion Sk, 93 branch offices and 172,000 clients. The new bank will be a part of the biggest banking network in the Central and Eastern Europe, and will operate under commercial name 'UniCredit Bank'.

HVB Bank Slovakia belongs to medium-sized universal banks on the Slovak banking market. It has a particularly strong position in the area of corporate banking, however, its services are also provided to both private and business clientele. Due to being a member of the European banking concern, the bank has extensive expertise also in the area of real estate financing. As of October 2006, HVB Bank Slovakia's services have been used by over 42,000 private, business and corporate clients via a branch network comprising 27 branch offices (as of 24 November 2006).

HVB Bank Slovakia introduced several attractive products – particularly in the retail segment – to the market in 2006. HVB Hypoúvěry and HVB Kreditná karta continue to be among the bank's key products. A number of events were organised in relation to these two products. The bank has also been very successful in real estate, business, structured and public financing. In the year 2006, HVB Bank Slovakia and the Pioneer Investments SR group (both members of the UniCredit Group) started close co-operation focusing on the provision of investment products. Starting from October 2006, the clients of HVB Bank Slovakia can choose from a complex product range of the Pioneer Funds at any outlet, which opens new possibilities to increase the value of their financial means. In the same year, the bank was given a prestigious award by specialised British magazine Global Investor (Euromoney Group) in the area of securities custody in Slovakia.

# I.D.C. HOLDING, a.s.

---

Joint-stock company I.D.C. Holding is one of the most important producers of confectionery and biscuits in Slovakia. The company's beginning dates back to 1992, when two partners (Prof. PhDr. Ing. Štefan Kassay, Dr.Sc. and Ing. Arch. Pavol Jakubec) founded Investment Development Company Ltd, based in Prague, with registered capital of 106,851 CzK. On 16 January 1997, joint-stock company I.D.C. Holding was created as a legal successor of I.D.C. Ltd, with registered capital amounting to 263.4 million Sk. In 2001 the company increased its registered capital (from undistributed profits of previous accounting periods) to 460 million Sk.

I.D.C. Holding keeps an important position on the domestic and foreign markets, due mainly to the production of quality products that are pushed to the market with a well-targeted marketing support. The company's production is located in two separate plants with a nearly 100-year-long tradition of production: Figaro Trnava and Pečívárne Sered'. I.D.C. Holding's product range comprises wafers, biscuits and gingerbreads. The company's salty assortment is represented by salty crackers and its confectionery comprises candid products, rock products, jelly products, pectin-based whipped products (coated), fondant products, desserts and seasonal products.

I.D.C. Holding has been substantially innovating its product range and making every effort to provide the customer with products with more attractive design. The company has been tailoring its product range to the consumer's needs and taste in order to maintain or, respectively, increase competitiveness on the market. In the first half of 2006, the company's marketing activities concentrated mainly on the introduction of seasonal products (a presentation of the Christmas product range for the year 2006). In the second half of the year, the focus of communication was on a consumer competition (named 'Ako Kubko s Mat'kom poklad od SEDITY rozdali') intended to support the SEDITA brand. In addition to said activities, the promotion of the BOMBI brand ran throughout the year 2006, with the company targeting primarily the youngest demographic (i.e. kids in schools) through a series of entertaining and educational events.

An audit was performed in I.D.C. Holding in the period of 26-28 April 2006. It confirmed the fulfilment of food safety requirements and, subsequently, the company was given a certification according to the International Food Standard and British Retail Consortium for the confectionery production. In the period of 18-19 July 2006, the company successfully completed a re-certification of the quality management system according to the ISO 9001/2000 standard.

As of 31 October 2006, I.D.C. Holding realises 54% of production on the Slovak market, 35% in the Czech Republic and 11% on other export markets. Among its most important customers are companies such as Billa, CBA Slovakia, COOP Jednota Slovensko, Kaufland Slovenská republika, METRO Cash & Carry Slovakia, SLOVPOS, TESCO STORES SR, Carrefour Slovensko and AHOLD Retail Slovakia.

# **ISTROBANKA, a.s.**

---

ISTROBANKA has been successfully operating on the Slovak banking market since the year 1992. The bank's founding shareholder was Slovenská poist'ovňa Bratislava. Austrian banking group BAWAG P.S.K Bank für Arbeit und Wirtschaft und Österreichische Postsparkasse AG became a 100-percent owner of ISTROBANKA in 2002. The entry of BAWAG has created suitable conditions for ISTROBANKA to strengthen its position among the Slovak banks, and opened new possibilities for growth.

With a balance sheet total of nearly 34 billion Sk, more than 130,000 clients and a network of 60 outlets throughout Slovakia, ISTROBANKA ranks among the biggest Slovak banks. The company's complex portfolio of products and services is targeted at all client groups and comprises deposit/credit/payment products and services, treasury products, international banking and financial leasing. In addition to traditional banking products, ISTROBANKA offers its clients a possibility to invest in the mutual funds of subsidiary company ISTRO ASSET MANAGEMENT, financial and operational leasing via subsidiary company ISTROLEASING Ltd and products of co-operating partners Allianz – Slovenská poist'ovňa and Wüstenrot stavebná sporiteľňa.

As of 30 September 2005, ISTROBANKA posted a profit of 134.2 billion Sk (according to international accounting standards), with total assets amounting nearly to 34 billion Sk. A positive development was recorded in the area of credit transactions, with the bank's credit balance increasing by nearly 19% on a year-on-year basis. The area of mortgage loans also witnessed significant growth, as the bank granted loans totalling nearly 800 million Sk in the first 9 months of the year 2006. The fifth place among the banks with a licence in this field makes ISTROBANKA one of the most important mortgage banks in Slovakia. Developing new products and finding new possibilities to finance projects of micro-, small- and medium-sized enterprises have traditionally been among the bank's key activities. In May 2006, ISTROBANKA broadened its portfolio of active products with investment loans, which allow small and medium-sized enterprises to finance their medium-term and long-term needs. Further development of activities in the area of municipal financing was realised by ISTROBANKA in compliance with its strategic plan, which focuses on acquiring a relevant share on the market of municipal and public financing.

The improving performance results and ISTROBANKA's position on the market have been recognised by world rating agency Moody's Investors Service. On 13 July 2006, the agency raised the company's long-term national rating to 'Aa2', with a stable outlook.

# ISTROKAPITÁL, a.s.

---

Joint-stock company ISTROKAPITÁL was created in 1996 through a merger of four investment funds from the first wave of the voucher privatisation - IF Inovec, IF Pohronsko-Ipel'ský, IF Zobor and IF Prosperita Severu. The company concentrates primarily on the area of financial markets. ISTROKAPITÁL's core business is the trading activity in the extent of free trade: retail trade, wholesale and intermediary activities. The company focuses mainly on the banking sector, although investments in real estates also represent a substantial part of its business. In addition, the company has started activities in the area of information technologies. ISTROKAPITÁL's economic strategy aims primarily to increase own investments in selected business entities in order to achieve the position of an investor participating in the control and management of their business activity. With its activities, ISTROKAPITÁL belongs to major financial groups that manages assets and is engaged in business activity in the Central European region.

ISTROKAPITÁL has investments in joint-stock companies Poštová banka, ISTROKAPITÁL SLOVENSKO, ISTROKAPITÁL DEVELOPMENT and RUN FIVE Media Technologies. In the year 1999, the company made a capital investment in joint-stock company Poštová banka and carried out its revitalisation process in co-operation with Slovenská konsolidačná. With the approval of the National bank of Slovakia, the company acquired a 55-percent share in Poštová banka in 2003, which made the latter its subsidiary company. ISTROKAPITÁL has publicly declared its interest in buying Slovenská konsolidačná's share in Poštová banka (i.e. 37.12% of shares) in order to concentrate a 92-percent share in the bank's registered capital. In the nearest period, the financial group aims to increase the value of its investment and reinforce the position in Poštová banka. Other activities will focus on the realisation of various developer projects and on the area of information technologies.

In 2006 ISTROKAPITÁL announced the transformation of its legal form into a European company through a merger with KANGIMA INVESTMENTS PUBLIC COMPANY LIMITED, based in Cyprus. The merger and creation of a European company were approved at an extraordinary general meeting of company shareholders on 15 December 2006. Starting from 1 January 2007, all transactions of the merged companies will be regarded as the transactions of a newly created company ISTROKAPITAL SE, based in Cyprus. ISTROKAPITÁL's transformation into a European company has been performed in order to create a supranational holding company that will do business, via its subsidiary companies, on the promising markets of the Central and Eastern Europe. Following this plan, joint-stock company ISTROKAPITÁL SLOVENSKO has been founded to cover activities in the Slovak Republic. Preparations are underway for a company to be founded in the Czech Republic, as well as in other countries, depending on the development of activities and realisation of projects of the ISTROKAPITÁL group.

# LEASING SLOVENSKEJ SPORITEĽNE, a.s

---

Leasing Slovenskej sporiteľne was founded by a foundation charter in July 2003 for an indefinite period, with registered capital in the amount of 50 million Sk. Its founders were Slovenská sporiteľňa and EBV - Leasing Gesellschaft m.b.H. & Co. KG. In the year 2004, the latter company's minority share was transferred to EBV Beteiligungen GmbH, a subsidiary of Erste Bank and Austria's second best provider of leasing of transport technology. In April 2005, the company general meeting approved an increase of registered capital to 75 million Sk, with the increased part being repaid by company Slovenská sporiteľňa. On 1 November 2005, Leasing Slovenskej sporiteľne merged with company SPORING. This has not only increased the company's registered capital by 74,554,000 Sk, but also raised the Slovak banking institution's share in the leasing company to 96.66%.

Leasing Slovenskej sporiteľne focuses primarily on the provision of financial leasing of movables such as passenger cars, utility vehicles, trucks, other transport machinery, equipment and technology. The company offers operational leasing and financing via instalment sale as supplementary products. In the provision of services to clients, Leasing Slovenskej sporiteľne acts also as an intermediary of insurance. For this reason the company concluded, in the period of 2004-2005, general agreements on co-operation in the areas of insurance policy conclusions, insurance collection and administration of insurance of motor vehicles/connectable vehicles with the following insurance companies: KOOPERATIVA poist'ovňa, Allianz - Slovenská poist'ovňa and Česká poist'ovňa - Slovensko. The company provides services to both natural persons and legal entities, and is a member of the Association of Slovak Leasing Companies (ASLC). Its fundamental difference and competitive advantage is the sale via a wide network of Slovenská sporiteľňa outlets, which is - from a client's perspective - synonymous with swiftness, simplicity and, most of all, accessibility.

In spite of being active on the leasing market for a relatively short time, the company achieved a positive performance result during the year 2006, which stemmed mainly from a substantial increase in both the number and the financed volume of new contracts. In the first three quarters of 2006, the company provided financing in the total worth of 3,022,018,000 Sk (in purchase prices), thus ranking 7th in the chart of leasing companies compiled by the ASLC. It is an increase by 103% against the same period of the previous year. In order to supplement the financing of its activity by means of bank loans, the company issued bonds in the total volume of 1.1 billion Sk in 2006. Leasing Slovenskej sporiteľne expects to achieve a positive economic result at the end of the year 2006.

## Shareholder structure as of 30 September 2006

# LUDOVÁ BANKA, a.s.

---

LUDOVÁ BANKA was founded in 1991 as the first bank with foreign capital in the former Czech and Slovak Federative Republic. Its main shareholder is Austrian company VOLKSBANK INTERNATIONAL AG (VBI). The VBI's majority shareholder, with a 51-percent share, is Österreichische Volksbanken-AG. Minority shareholders are German DZ BANK AG / WGZ-Bank AG which together own 24.5%, and French bank Banque Fédérale des Banques Populaires with an identical share (24.5%).

The bank has a full foreign-currency licence and a licence to execute mortgage-banking transactions. LUDOVÁ BANKA focuses primarily on retail banking, but it also provides services to nearly 20,000 corporate clients ranging from small- and medium-sized enterprises to big multinational corporations. Via a network of 48 outlets, LUDOVÁ BANKA offers to its clients a complex range of banking products and services, enriched with mutual funds of Austrian company Volksbanken-KAG, life insurance products, pension security products of company VICTORIA-VOLKSANKEN Pois'ovňa and building savings via company Wüstenrot stavebná sporiteľňa. LUDOVÁ BANKA co-operates with the financial group ING in the area of old-age pension savings; their mutual sale officially started on 16 December 2004. This partnership allows the bank's clients, as well as other individuals, to obtain information and conclude the agreements on old-age pension savings directly in the outlets of LUDOVÁ BANKA located throughout Slovakia. Special care is taken of corporate clients via the bank's network of business centres. In December 2005, international rating agency Fitch Ratings confirmed for LUDOVÁ BANKA a long-term rating 'BBB' and a short-term rating 'F3'.

In the first 9 months of 2006, the company achieved a pre-tax profit of 244.9 million Sk according to international accounting standards. It is a 28-percent increase against the same period of last year. The bank's balance sheet total amounted to 36 billion Sk, increasing by 16% on a year-on-year basis. The volume of loans to clients totalled 21.7 billion Sk, representing a year-on-year increase of over 15%. LUDOVÁ BANKA has been successful in the provision of loans to individuals, the volume of which rose by 36% in 12 months. In a year-on-year comparison, the volume of mortgage loans rose by 27% and the volume of consumer loans went up by 37%. LUDOVÁ BANKA has also recorded a significant increase in the volume of loans provided to small traders and micro-entrepreneurs. The volume rose by as much as 35% against the same period of last year, i.e. from 1.1 billion Sk to 1.6 billion Sk in absolute terms.

# MATADOR a.s.

---

The history of MATADOR dates back to the year 1905, when company ‘MATADOR- gumové a balatové závody’ was founded. MATADOR was nationalised in 1945 and became a national company in 1946. The rubber factory in Púchov was given the status of state-owned company 42 years later. In 1990 it transformed into a joint-stock company. A part of the transformation was the change of trade mark so that, starting from July 1993, the company’s products could again be sold under the ‘Matador’ brand. MATADOR commemorated a jubilee of its founding in 2005 and, on this occasion and within the framework of revitalisation, it decided to change the original logotype. A new logotype was presented to the public at the Nitra 2005 Automobile Show.

MATADOR is an independent business group that does business on international markets in two basic areas: RUBBER (tyres, conveyor belts, machinery and equipment for rubber industry) and AUTOMOTIVE (delivery of parts for automotive industry). The company provides 83% of Slovakia’s rubber production, and exports 81% of its production to 84 countries. As far as the Slovak economy is concerned, it is the 10th biggest exporter. The Slovak Republic’s entry into the European Union allowed MATADOR to become the 11th regular member of the European Rubber Manufacturers’ Conference.

Notwithstanding the great interest of its competitors (e.g. Krupp, VMI), in the first half of 2006 MATADOR signed a contract for delivery of tyre-building machines, worth approximately \$14 million, for a new project in Triangle - China’s biggest tyre producer. In July 2006, joint venture Matador - Omskshina was given a national prize named the ‘Taxpayer of the Year’ in the Russian Federation; the prize represents the good financial and economic policy of the company management. However, this was not for the first time that MATADOR was awarded for its activity in Russia. At the TIRES & RUBBER 2006 Expo, Matador tyres were given four (three gold and one silver) medals. Several days later, the Russian Chamber of Commerce and Industry awarded the joint venture Matador - Omskshina a golden memorial tablet for successful development and realisation of an investment project, focused on extending the production capacity of personnel radial tyres and light truck tyres in Omsk. MATADOR was placed among the Slovak SUPERBRANDS in October 2006, following a decision of an independent panel of experts – the Superbrands Board. In the fourth quarter of 2006, an agreement on strategic partnership was signed by AUFEER DESIGN Ltd and Matador Automotive. The agreement was further confirmed by Matador Automotive’s investment into this company based in Mladá Boleslav, Czech Republic. One of the biggest Slovak companies, MATADOR, has thus become the holder of a one-third share in AUFEER DESIGN Ltd, with a primary goal to further support the firm’s activities on the Czech, Slovak and international automotive markets.

# NOVITECH a.s.

---

The company's history started in 1989 when NOVITECH was founded as a trading partnership; it transformed into a joint-stock company in 1996. The rapid advancement and expansion of information technologies in the former Czechoslovakia had a positive effect on NOVITECH's development, so it gradually achieved a position among important IT companies in Slovakia. NOVITECH operates in the area of development and implementation of extensive information systems and project management, which is closely connected with its educational activities, training courses and e-learning courses. The company is part of the NOVITECH Group, which operates not only in Slovakia but also in other EU countries via a network of branches (independent legal entities). At present the NOVITECH Group, together with its specialised subsidiary companies and branch offices, employs more than 200 workers. For business entities in the Slovak Republic, NOVITECH works on smaller- and medium-extent projects that focus on process management, cost analysis and company performance assessment as well as management of documentation and workflow.

The company has also expanded into the EU countries, which is proved by the projects it currently realises within the framework of the European Commission's development programmes. Among projects for the EU's central institutions, the 'eFarmer' is the most important one. It develops a system for submission of applications for farmer subsidies, their preparation and realisation. The project covers the V-4 countries, and its main objective is to assist farmers in obtaining resources from the European Union. Among its domains are internetisation, electronic submission of applications and electronic services focused on IT-related support of development of the agricultural sector. The 'SILC' is another important EU project. It concentrates on development of methodology, software and execution of a pilot statistic of income and living conditions in the Slovak Republic. In the education area, there is an important project of development of educational programmes for small- and medium-sized enterprises. The project is related to knowledge management (BPM – Business Process Management, e-business, project management and e-learning), which provides new technologies and new approaches to improving the competitiveness of the small- and medium-sized enterprises in Europe.

Due to the past restructuring, the structure of the company's results in 2006 changed in comparison with the previous years. The profit from economic activity was influenced mainly by the company's most important projects, such as 'MIS' and 'ADMIS' for the General Health Insurance Company (Všeobecná zdravotná poisťovňa). In January 2006 the company successfully completed the 'eBTS' project funded by the European Commission. The project aims to develop e-Learning programs for small- and medium-sized businesses in the European Union.

# OTP Banka Slovensko, a.s.

---

Since the year 2002, OTP Banka Slovensko (OTP Banka) has been utilising the know-how and shareholder support of OTP Bank Nyrt., the biggest Hungarian bank with acquisitions in Bulgaria, Croatia, Romania, Serbia, Ukraine and Russia. The predecessor of OTP Banka Slovensko was founded during the privatisation of state-owned financial institution Investičná banka Praha in 1992, when this institution was split into two independent legal entities: Investiční banka Praha and Investičná a rozvojová banka Bratislava.

OTP Banka's commercial activity has been dynamically growing and its profitability has been on the rise. In nearly 5 years of operation within the OTP Group, the bank has reinforced its position of a universal banking institution with a wide range of products of services provided to both retail and corporate clientele on a competitive market. In the provision of mortgage loans, it ranks fourth among ten banks that own a licence to provide this kind of loan. During this period the bank witnessed its total assets rise by a factor of over 2.2, plus a significant increase in profit as well as in business profitability indicators.

OTP Banka's total assets of 43.1 billion Sk (as of 30 September 2006) have increased since the start of the year by nearly 10%. A dynamic rise of 21% was recorded in the area of client deposits. The volume of loans provided to clients decreased in the period from the start of the year. It is mainly due to a premature repayment of a large amount of loans of one important client. OTP Banka finances a part of its business activities via the capital market, where it belongs to major issuers of securities. In this year the bank carried out two own issues of mortgage bonds (in the total nominal value of 1 billion Sk), which provide the financing of mortgage loans. OTP Banka currently has 9 issues of mortgage bonds (in the total nominal value of 5.7 billion Sk) and 1 own bond issue (in the total nominal value of 1 billion Sk) placed on the parallel listed market of the Bratislava Stock Exchange.

The bank has a network of 74 branch offices, 5 regional corporate centres and 7 centres for housing loans. In meeting its business objectives, the bank utilises a gradually widening network of intermediaries. By means of these outlets, OTP Banka offers not only banking products and services but also the products of the OTP Group members. For the period of January-September 2006, the bank has posted an after-tax profit of 169.9 million Sk, which is a 6.8-percent increase against the same period of the previous year. For the year 2006, the bank expects its after-tax profit to increase by a minimum of 26% on a year-on-year basis.

Since September 2005, the company has had its own rating set by rating agency Moody's Investors Service. The rating of foreign currency deposits is at the 'A2/Prime-1' level; the financial strength rating is at the 'D-' level.

## Shareholder structure as of 30 September 2006

OTP BANK Rt:	97.23%
Other shareholders:	2.77%

# SLOVENSKÁ SPORITEĽŇA, a.s.

---

Slovenská sporiteľňa started its activity as early as in the year 1953 as a part of Československá štátnej sporiteľňa (state-owned Czechoslovak Savings Bank). Since its transformation into a joint-stock company in 1994, the bank has operated under trade name 'Slovenská sporiteľňa'. Six years later, Erste Bank der österreichischen Sparkassen AG became its majority shareholder. In April 2004, Erste Bank bought a 10-percent share for €72 million from the National Property Fund. Erste Bank then exercised an option for the remaining 19.99%, owned by the European Bank for Reconstruction and Development, and became a 100-percent owner of Slovenská sporiteľňa in January 2005.

With clientele of 2.5 million, Slovenská sporiteľňa is currently the biggest universal commercial bank in the Slovak Republic with a banking licence and a licence to perform mortgage-banking transactions. The company provides its clients with complex banking services via the largest distribution network comprising 300 outlets. Slovenská sporiteľňa has a longstanding leading position in total assets and client deposits, as well as in the quantity of issued VISA and MasterCard Europe cards. The bank has also expanded in the area of loans, where it has been the market leader since the year 2005.

In comparison with the year 2005, the total volume of consumer loans in Slovenská sporiteľňa rose by over 11% in the first three quarters of 2006. The volume of provided housing loans amounted to 12 billion Sk. These numbers make Slovenská sporiteľňa the clear number one on the Slovak market of private loans. As the first bank in Slovakia, the company started issuing the Maestro chip cards in 1998. As of the end of September 2006, the bank has issued nearly 1.13 million payment cards, with which 33 million transactions in the total volume of nearly 73 billion Sk have been made (via ATMs and point-of-sale terminals). As of the end of September 2006, the bank has operated 544 ATMs and 5,238 point-of-sale terminals.

In the year 2006, Slovenská sporiteľňa was awarded as the best bank in Slovakia by prestigious magazines Euromoney and The Banker, and as the bank of the year by the Trend weekly. The bank was also awarded as the company with the best annual report in electronic form, plus four products of the bank and its subsidiaries were awarded as the best on the market in their respective categories (the 'Golden Crown' award). The bank has based its activity on the dominant position in the asset management area (deposit products, mutual funds, life insurance) and has been reinforcing the leading position on the market of loans for both individuals and businesses. The bank has started selling structured deposit products, which combine the guarantee of return of investment with an option of achieving very attractive revenue, linked to the products of the foreign currency and securities markets. In the first 9 months of the year 2006, Slovenská sporiteľňa issued 8 tranches of structured products in the total amount of 4.7 billion Sk, which were successfully placed on the market.

# SLOVENSKÉ ENERGETICKÉ STROJÁRNE a.s.

---

Joint-stock company SLOVENSKÉ ENERGETICKÉ STROJÁRNE (SES) is one of Slovakia's most important producers of power-engineering systems. Its history dates back to the year 1950 when company 'Levická kotláreň' was founded; it was renamed to 'Závod S.M. Kirova n.p. Levice' one year later. State-owned company Slovenské energetické strojárne Tlmače transformed into a joint-stock company in the year 1992.

The company's core activity focuses on the supply of investment wholes, in particular the supply of power-plant blocks and heating systems for combustion of coal, oil, gas, biomass, wood waste and fuel combinations. SES provides to its customers complex services, design, delivery, assembly and putting of systems into operation. The company also provides the reconstruction and general overhaul of power-engineering systems. Its main customers are electricity and heat producers, power engineering at the corporate level and various investors in the fields of power engineering, ecology, gas engineering as well as chemical and petrochemical industries. The company is export-oriented and exports 87% of its production to foreign markets.

In the year 2006, the company successfully penetrated various foreign markets. Competing with several European companies, SES succeeded with the delivery of a municipal waste combustion boiler for an incineration plant in the Swedish city of Malmö. In the area of production/delivery of fluid boilers for power-engineering wholes, the company successfully penetrated the Turkish market by signing a contract with company EREN ENERJİ ELEKTRİK ÜRETİM, based in Istanbul. The contract is worth more than 1 billion Sk. SES also successfully entered the fierce Swiss market by signing a contract on the delivery of a combustion boiler for the 'Tegra 2' project. On 3 February 2006, SES signed a contract with German company Martin Umwelt-und Energietechnik, based in Munich, on the complex delivery of a boiler including engineering, production, delivery, assembly and putting into operation. The value of this contract exceeds 0.5 billion Sk. The company has further reinforced its position on the Hungarian market. It has been proved by the signing of a contract (on 17 March 2006) on the delivery of three waste heat boilers for the 'Eszak Buda' project. After more than 20 years, at the time of Brazil's economic growth, SES signed a contract on the delivery of two steam boilers for metallurgic gasses combustion to this country. SES will be a sub-contractor of Brazilian company Camargo Correa, which supplies a complete 60-MW block for a steelworks located in Brazilian state Minas Gerais. In the first half of 2006, the company manufactured a vibratory grate for Detroit Stoker Company, a US-based firm. Interesting about this project is the fact that it is the first vibratory grate manufactured by SES, and the grate itself will be part of a combustion chamber of a boiler, which is made for a sugar refinery located on the Reunion Island (near Madagascar).

## SLOVNAFT, a.s.

---

SLOVNAFT is the leader in crude oil processing and petrochemical industry. The company currently ranks among the five most progressive refineries in Europe. It annually processes approximately 5.5 million tonnes of crude oil, which comes primarily from the Russian Federation and is transported to Bratislava via the Družba oil pipeline. Thanks to modern technologies, the company efficiently processes crude oil into quality products with a high added value. SLOVNAFT supplies to the market a complete range of refinery/petrochemical products and plastics. About 75% of its production are exported - mainly to the Czech Republic, Germany, Austria, Hungary, Poland and Italy. This refinery and petrochemical company has already been able - since the year 2004 - to produce the total volume of its petrol and diesel oil in a quality that the European Union will not require before the year 2009.

In the early 90-ties, SLOVNAFT transformed from a state-owned company into a joint-stock company within the first wave of the voucher privatisation. The privatisation was completed at the start of the year 1998, with joint-stock company SLOVINTEGRA (owned jointly by the management and employees) becoming a majority shareholder. On 31 March 2000, SLOVNAFT signed an agreement on strategic partnership with MOL, one of the biggest Hungarian corporations. The partnership with MOL has significantly reinforced the company's financial position. In addition, its credit portfolio has been restructured, registered capital has increased and synergic effects have been applied in all key activities.

As of the end of September 2006, the Slovnaft Group posted a net profit of 7.3 billion Sk. It is a 6-percent increase against the same period of the year 2005. What had a negative influence on the company's economy was the revaluation of inventory, the lower margins of other refinery products and the Slovak currency's strengthening against the US dollar. These factors had a negative impact on the Group's performance in the total amount of 4.025 billion Sk. On the other hand, higher production/sale volumes, better crack spreads of petrol and a better Brent-Ural spread positively influenced the performance in the said period. A fluent operation with no major outages contributed to a higher volume of processed crude oil (compared to the previous year). In the first three quarters of 2006, the Slovnaft Group continued its focus on the main source of profit – the export markets – where the company's sales rose by 32% on a year-on-year basis. The Slovnaft Group's capital expenses and investments amounted to 1.9 billion Sk as of 30 September 2006, which is an increase by 0.3 billion Sk compared to the first 9 months of the year 2005. Among the projects with the highest volume of investments are the company's environmental projects and those intended to maintain the operating reliability of its technology (including periodic checks). In the period of January-September 2006, 43 petrol stations were closed and two new ones were opened. As of the end of September 2006, SLOVNAFT operates 215 petrol stations in Slovakia.

# TATRA BANKA, akciová spoločnosť

---

Tatra banka, a member of Austrian Raiffeisen Banking Group, was founded in 1990 as the first private bank with foreign know-how in the former ČSFR. The history of the name ‘Tatra banka’ dates back to the year 1885 when ‘Horno-uhorská banka TATRA’ was founded. During the nationalisation process in 1946, ‘SLOVENSKÁ TATRA BANKA’ was created through a merger with Slovenská banka. The former was incorporated into the State Bank of Czechoslovakia in 1950, and put into a so-called state of peace.

In 16 years of its operation on the Slovak market, Tatra banka has gained a prominent position of a universal banking institution, and has ranked among the most important financial institutions in Slovakia. From a long-term perspective, the company has succeeded in maintaining its dominant position. It offers a complex range of banking services, to both retail and business clientele, via a network of branch offices and outlets located in all regions.

During the year 2006, Tatra banka maintained continuous growth of its important financial indicators. According to individual financial statements, the company achieved a gross profit of 2.44 billion Sk in the first 9 months of 2006. It is nearly a 17-percent increase on a year-on-year basis. The bank’s total assets amount to nearly 196 billion Sk (as of 30 September 2006). As of the end of September 2006, Tatra banka has provided loans in the total worth of 96.4 billion Sk to clients. In the first three quarters of 2006, the volume of provided loans rose by 14.8 billion Sk (i.e. more than 18%).

The number of Tatra banka’s outlets in 2006 rose to 144. In the course of the year, the company opened three new branch offices in Bratislava, plus branch offices in Prešov, Sereď, Košice, Kežmarok and Dolný Kubín. Tatra banka has also widened its network of Housing Centres with a new branch in Košice. This year the bank introduced to the Slovak market a unique concept combining a branch office with a coffee bar. The first branch of this kind was opened in February 2006 under the name ‘Bank + Coffee’.

The bank was for the fifth time given the prestigious ‘Best Consumer Internet Bank’ award by renowned economic magazine Global Finance in 2006. The magazine also pronounced Tatra banka one of the ‘World’s Best Foreign Exchange Banks 2006’. The Euromoney magazine confirmed Tatra banka as the leader in project financing, rating it as the ‘Best Real Estate Commercial Bank in Slovak Republic 2006’.

In February 2006, international rating agency Moody’s gave Tatra banka a foreign currency deposit rating at the ‘A3/Prime-2’ level and a financial strength rating at the ‘C-’ level. In August 2006, Standard & Poor’s Ratings Services increased Tatra banka’s rating outlook from stable to positive. The agency also confirmed the ‘A-/A-2’ rating for short-term and long-term liabilities.

The predecessor of UniBanka - POĽNOBANKA – was founded in 1990 under trade name ‘Slovenská poľnohospodárska banka, účastinná spoločnosť’. It was the first private bank in Slovakia. Its founding shareholders comprised Slovenská poisťovňa, agricultural co-operatives and organisations from the resort of the former Ministry of Agriculture and Nourishment, as well as food producers and natural persons. A milestone in the company’s history was the entry of the European Bank for Reconstruction and Development (EBRD), which became a shareholder (with a 20-percent share in registered capital) in 1993. Two Italian financial groups - UniCredito S. p. A. and Finest S. p. A. - made capital investments in the bank in 1996, each acquiring a 7.5-percent share in registered capital. Their entry has provided the bank with new forms to push the strategy of universality. POĽNOBANKA has designed and implemented a plan of development and support of co-operation between Slovak companies and their Italian counterparts, which has resulted in the signing of an agreement on co-operation with UNIMIS (the Association of Italian Entrepreneurs in Slovakia). The bank has also broadened its product range with the sale of Viacard and Telepas. Italian financial and banking group UniCredito Italiano S. p. A., based in Milan, acquired a majority share in the bank in November 2000. The entry of this financial group into POĽNOBANKA marks the end of the capital- and shareholder-related restructuring of the bank. Following new, more demanding objectives and aiming to broaden the scope of the bank’s activity, the bank shareholders decided to change its trade name to ‘UniBanka’ at an extraordinary general meeting on 21 January 2002. A merger of two banking groups - UniCredito Italiano S.p.A. and Bayerische Hypo-und Vereinsbank AG – was legally finished in 2005. Following the merger, two Slovak banks (HVB Bank Slovakia and UniBanka) are expected to merge in the course of the year 2007.

Joint-stock company UniBanka is a medium-sized universal bank with a strong position among the corporate clientele and, after the entry of the foreign investor, with a strategic focus on retail banking. UniBanka has 70 outlets in Slovakia, which comprise 10 branch offices, 59 sub-branches and a specialised branch ‘HypoDom’. In co-operation with insurance company Allianz - Slovenská poisťovňa, UniBanka offers life insurance, investment insurance, as well as travel insurance as an add-on to payment cards. The bank has recently started activities in the area of additional pension insurance in co-operation with AEGON (additional pension insurance provider). In its network of outlets, the bank offers the mutual funds of world-renown company Pioneer Investments. UniBanka is a modern and innovative company that always endeavours to introduce new products and services to the market. It was the first bank on the Slovak banking market to offer service bundles, structured deposits for individual investors and the option of changing a payment card’s PIN directly through the ATM. Within the framework of new activities, the bank offers complex care to small- and medium-sized businesses in its specialised centre ‘BiznisDom’.

## Shareholder structure as of 30 September 2006

UniCredito Italiano S.p.A.:	97.11%
Ministry of Agriculture of the Slovak Republic:	1.09%

# VŠEOBECNÁ ÚVEROVÁ BANKA, a.s.

---

Všeobecná úverová banka (VÚB) was founded on 1 January 1990 as a state-owned financial institution, when the State Bank of Czechoslovakia hived-off its commercial activities for corporate clients in the Slovak Republic. The bank transformed into a joint-stock company in the year 1992. A real turning point in its operation, however, came with the privatisation process when IntesaBci – an Italian banking group – acquired a majority share in VÚB at the end of 2001. With clientele of over 1 million and a market share of 20%, VÚB is the second biggest bank in Slovakia and, since the year 2003, it has been ranked as the first most profitable bank on the Slovak market in absolute terms. VÚB is a universal bank with a licence to provide a full range of banking services to individual, corporate and institutional clients. The core of its offer includes mortgage/consumer loans, deposit/payment products and services, corporate banking and financing of foreign-trade activities. Via its subsidiary companies, VÚB also provides services in the area of mutual funds (VÚB Asset Management), pension saving (VÚB Generali), consumer finance (Consumer Finance Holding) and factoring (VÚB Factoring). The bank also acts as intermediary for an offer of insurance products. Its services are provided through a large network of outlets, which includes 32 corporate and 209 retail branches. VÚB also operates 11 mortgage centres, which it has decided to place - as the only Slovak bank - not only in Bratislava, but also in every region of Slovakia.

One of the most important events in the bank's history is the acquisition of a financial group oriented on instalment sale and comprising TatraCredit, QUATRO, Q-CAR, SLOVENSKÁ POŽIČOVŇA and Slovenské kreditné karty. The entire transaction was completed in the year 2005, with the acquired companies integrating into a newly founded subsidiary Consumer Finance Holding. The bank has thus acquired further 400,000 clients and significantly reinforced its position on the market of personal loans.

In May 2006 VÚB entered a partnership with American Express, which has allowed it to become the exclusive issuer of American Express cards in Slovakia. VÚB has been issuing AMEX Gold and Blue AMEX credit cards. The bank has also brought a novelty to the Slovak market – the Cash-back service. The service allows the bank to refund to the client a part of the price of goods from each payment made with a Blue AMEX card.

In the course of the year 2006, VÚB was granted several important awards by prestigious foreign financial magazines. In March it was again awarded by Global Finance magazine as one of the 'Best Emerging Markets Banks 2006' and, for the second time in a row, as the 'Best Bank in Slovakia'. Another award – the 'Bank of the Year 2006 in Slovakia' - was given to VÚB by The Banker magazine in December. The bank's ratings were also raised recently – first by Fitch Ratings in March and then by Moody's in October.

## Shareholder structure as of 30 September 2006

UniCredito Italiano S.p.A.:	96.49%
Other shareholders:	3.51%
